Figure 1 is a screenshot of a software interface titled "Setup-Change Product Watch". The interface is divided into three main sections by tabs: "Product Watch Inclusive", "Product Watch Exclusive", and "Product Watch Time". The "Product Watch Inclusive" tab is currently selected.

Under the "Product Watch Inclusive" tab, there is a "Select Position" section. It contains three rows of input fields: "Latitude", "Longitude", and "Radius". Each row has a dropdown menu, a numeric input field, and a "Load" button. The "Radius" field is labeled "Miles".

Below the "Select Position" section, there are two date/time selection sections. The first section, labeled "Start Date", includes dropdowns for "Month", "Day", and "Year", and radio buttons for "Start Immediately", "AM", and "PM". A similar section for "End Date" is also present.

At the bottom of the dialog, there is a table titled "Product Watch Description:". The table has four columns: "Description", "Latitude", "Longitude", and "Radius". The table lists several locations with their corresponding coordinates and radii.

At the very bottom of the dialog, there are two buttons: "Queue" and "Cancel".
